Jim Butler Construction
11337 E 60th Pl
Tulsa OK 74146

Dear Jim Butler;

We have now been in our new building for four months and thought it time to tell you how very pleased we are with our new home.

This is the second construction of a new financial institution that I have been involved in; by far the best experience and the best result.

The entire process has far exceeded my expectations. From the manner in which the planning meetings were conducted to the service received after move in has been handled professionally and always with a dedication to the satisfaction of the credit union.

All questions have been answered, requested changes were dealt with promptly, suggestions were made to enhance the low maintenance building we were seeking, and some discrepancies in the shop drawings were identified and resolved to our complete satisfaction. Without the professionalism and vigilance of the construction superintendent, I know there would have been some serious issues resulting from some of the shop drawings.

We are so happy with the construction of our new home. We would welcome anyone to see for themselves what a beautiful facility it is.

Sincerely,

A handwritten signature in black ink, appearing to read 'Dana Warne', written over a light blue horizontal line.
